'SCHEMA'

Akbar Padamsee | Jogen Chowdhury

"The history of ideas, then, is the discipline of beginnings and ends, the description of obscure continuities and returns, the reconstitution of developments in the linear form of history. It becomes therefore the discipline of interferences, the description of the concentric circles that surround works, underline them, relate them to one another, and insert them into whatever they are not."

- Michel Foucault, The Archaeology of Knowledge & The Discourse on Language
